SUMMARY

Backend Developer Intern with experience building scalable REST APIs, AI-powered applications, and production systems using FastAPI, Node.js, LangChain, RAG, LLMs, and vector databases. Skilled in SMTP/network programming, CI/CD, Docker, authentication systems, and database design across CRM, HRMS, SaaS, and AI-based platforms.

EXPERIENCE

Backend Developer Intern

Dec 2025 – Present

MatchBest Group

- Designed and developed scalable REST APIs with validation, authentication, error handling, and modular backend architecture across multiple production systems.
- Mobiking (E-commerce Platform):** Live Migrated logistics integration from Shiprocket to Delhivery, improving shipment reliability and reducing API failures. Implemented secure token-based password reset functionality and resolved critical admin panel issues.
- Cavakil (Law Firm Website):** Live Developed admin-controlled dynamic modules and fixed frontend-backend integration issues to improve performance and user experience.
- AVA CRM (SaaS CRM System):** Live Worked on Meta, Apollo, inbound/outbound integrations, notification services using SSE/EventBus, and researched scalable SaaS database architecture.
- HRMS (Human Resource Management System):** Designed ER diagrams and optimized relational database structure for admin panel workflows.

PROJECTS

DocuAgent AI | *AI File Retrieval Agent* | [GitHub](#)

2026

- Built an AI-powered agent using Streamlit, FastAPI, LangChain, Groq LLM, Google Drive API, and vector databases for intelligent file and link retrieval.
- Implemented RAG-based search where users provide file name and type to retrieve relevant Google Drive resources with contextual responses.

SMTP Email Verifier | *SMTP & Network Programming* | [npm](#)

2026

- Developed an email verification system using SMTP programming, DNS/MX record validation, and socket-level network communication.
- Published as an npm package and handled real-world SMTP timeout and port-blocking challenges for reliable email validation.

StudHive | *Social Interface for College Updates* | [GitHub](#)

2025

- Built a full-stack web application using React, Node.js, Express, and MongoDB for sharing college news, events, and exam notifications.
- Implemented authentication, role-based access, search/filtering, and responsive UI features.

TECHNICAL SKILLS

Languages: C, Java, JavaScript, SQL

Backend: Node.js, Express.js, FastAPI, SSE, WebSockets, Prisma, Mongoose, SMTP, Network Programming

AI/LLM: LangChain, RAG, LLM Integration, Vector Databases, Groq API

Frontend: React.js, Next.js, Streamlit

Databases: MongoDB, MySQL, PostgreSQL

DevOps & Tools: Docker, CI/CD, Git, GitHub, Postman, VS Code, Vercel, S3, R2

EDUCATION

Maharshi Dayanand University

2022 – 2026

Bachelor of Technology in Computer Science

Govt. Model Sanskriti School

2021 – 2022

Intermediate (Science) — 86%

CERTIFICATIONS

- Web Development Certification — Coding Blocks
- Vocational Training in Core Java, OOPs, and Data Structures — Kretivan Technologies
